

Please join us for an eye opening, fun event! We are very pleased to invite you for the free Final Dissemination Seminar of the Erasmus+ funded project 'ECOLAH – Embracing a Complexity-Orientated Learning Approach in Health'. It will take place on Wednesday the 9<sup>th</sup> of October in the Energy Barn on the Campus in Groningen or as an alternative on the 10 of October online.

We offer insight and practical tools on **how** to become a learner in complexity and how complexity can become part of education:

What is learning in complexity?

How can this become part of education?

What do you do in daily education to learn in complexity?

What are the challenges and what are the great benefits?

Complex issues demand navigation in uncertainty and constant changing circumstances. This is evident in the grand social challenges such as climate change, an increasingly devastating economic model and the care for health. It is also evident on a much smaller scale. For a person who suffered a stroke and who needs to reinvent his life, there is no silver bullet, no recipe. How then to navigate? How to embrace this complexity?

Education barely prepares for how to deal with complexity, let alone how to treasure this!
